5. Common problems and analysis

Question 1: The glasses have no signal and the light is red。

The solution:

1. Confirm whether the computer connected to the eyewear is powered up.
2. Make sure your glasses are open, and you can switch state by the power button near the indicator light.
3. Make sure the glasses USB plug is connected to the computer's HDMI interface, try to pull it out, and then reconnect.

Question 2: The electric cylinder does not move

The solution:

1. Check whether the server is normally powered.
2. Check whether the server is wrong and try to restart the server when the server is out of power
